1.2. Manual Approval

This Edition was approved for use, subsequent to the review, update and approval process of the documented procedure “Control of SA Documents”, as indicated below.

The head of the Information Technology department should get the MD approval before any major manual revision and/or financial / recruitment changes. All minor amendments shall be approved by IT Sec.Mgr/ IT Mgr.

All IT personnel must be familiar with the use, compliance, and implementation of IT OPM.

It is strongly recommended that all Staff of Information Technology Services departments keep this IT OPM current and up to date and submit their any suggestions in writing to the concerned managers.

1.6. Manual Purpose

This IT OPM is designed to provide Saudia Academy IT employees with guidelines and rules to govern and direct their working practices within the company. Some of the areas will be very procedural - as this the natural of such document- but every effort has been made to ensure this document supports employees in their work areas.

Information Technology Manager is the custodian of this Manual.

INTENTIONALLY LEFT BLANK

1.7. Control of Documented Information

Documents required by the Quality Management System shall be controlled. Records are a special type of document and shall also be controlled.

1.7.1. Control of SA Quality Manual

Control of this manual is governed by the documented procedure “Control of SA Documents” as stipulated in SA Quality Manual.

Record Keeping

Form Title	Final Location (System/Folder)	Retention Period
Manual Review Form	PSAA Share File/Information Technology/ Manual Review Form	Permanent
Temporary Revision	PSAA Share File/Information Technology/ Temporary Revision	Permanent
Edition/Temporary Revision Control Form	PSAA Share File/Information Technology/ Edition-Temporary Revision Control Form	Permanent

1.7.2. Control of IT Records

Reference to the documented procedure “Control of SA Records”, stipulated in SA Quality Manual, the following are the established controls for IT Records:

All IT support tickets records are stored electronically in SA's account in “Freshdesk” cloud-based platform.

Meeting Minutes records and CBT Routine Card records are stored in PSAA Share File.

Both “Freshdesk” and “PSAA Share File” servers have an inherent backup feature, thus sanctioning an automatic backup record.

All IT records are retained permanently.

All IT staff and management can access and retrieve all IT records any time.

No IT records will be disposed.

Record Keeping

Form/Records Title	Final Location (System/Folder)*	Retention Period
EDRAK Routine Maintenance Card	PSAA Share File/Information Technology/Forms	Permanent
Meeting Minutes	PSAA Share File/Information Technology/IT Records/IT Meetings Records	Permanent
KPI Records	PSAA Account in Freshdesk support ticketing system (cloud-based)	Permanent

Chapter 2 Introduction

The basic function of the IT Department is to manage, maintain and control all SA Owned IT hardware, software and to provide IT support to Academy's staff and trainees.

2.1. IT Quality Objective

IT department is committed to provide support to all SA IT related projects, SA staff, TMS & EDRAK systems users (trainees and SA instructors). IT accomplishes this through following OPM.

All IT activities are carried out as described in our established standards/procedures and reflected in Office Procedures Manual. These standards are based on our own requirements and Training needs.

Measurement of this quality objective will be based on the principle, mechanism and identified KPIs (ref. to 02.01.01- P.20).

★ 2.1.1. IT Key Performance Indicator (KPI)

A key performance indicator (KPI) is a metric or measure. KPIs are used to quantify and evaluate organizational and achievement success. They measure how much success you've had and how much progress you've made relative to the objectives you wish to achieve. IT productivity and ultimately its profitability depends on making sure all of its staff perform up to, if not exceed their full potential. KPIs are also used to set measurable objectives, evaluate progress, monitor trends, make improvements, and support decision making.

A KPI measurement shall alert the management if there are impeding problems in a Key Performance Area (KPA) of the business.

The indicator consists of:

- a. The specific measurement data; and
- b. A predetermined standard against which the data will be compared to.

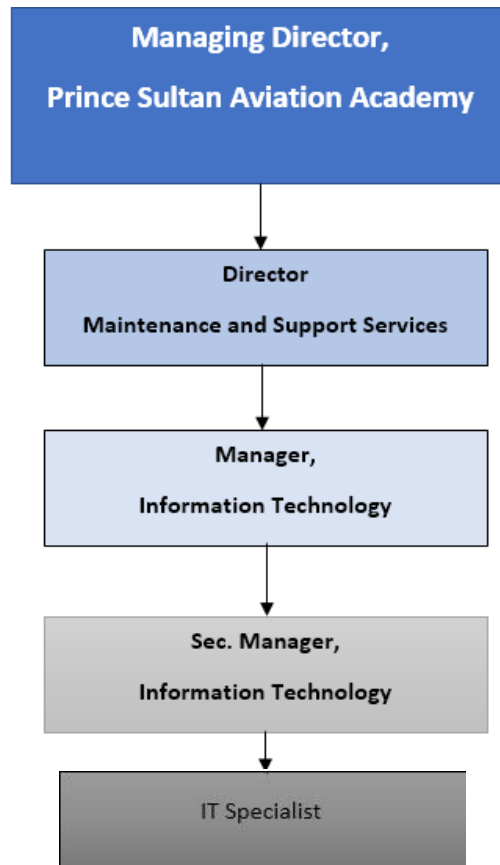

The following KPIs are set to measure IT department performance as follow:

- IT Specialist KPIs:
- Average respond time to support tickets within two working days of creation.
- Maintain a minimum of 97% (per year) closure rate for IT Tickets.

Failure to meet the established goals for each KPI will be addressed to start the process of problem solving and appropriate method for improvement

2.3. Duties and Responsibilities of IT Personnel

Refer to Academy Human Resource Manuals for all the Duties and Responsibilities of IT personnel.

INTENTIONALLY LEFT BLANK

2.4. Customer Complaints

The information obtained through the complaints-handling process can lead to improvements in products and processes and, where the complaints are properly handled, can improve the reputation of the organization. An effective and efficient complaints-handling process reflects the needs of both the organizations supplying products and those who are the recipients of those products.

All customer complaints received shall be directed to Manager Audit & Quality Assurance.

2.5. IT Support Ticketing System

SA has a subscription to Freshdesk support ticketing system (cloud-based) which is used to receive, follow and manage all IT defects ticket records. Manager IT is the "Account Administrator" and all other IT team members are assigned as "Agents". Access to SA's account is through the below link:

<https://princesultanaviationacademysaudiairlines.freshdesk.com/>

All IT specialists are requested to continuously check the platform for newly opened tickets and follow and close old tickets.

Beneficiary (staff/trainees) can open a support ticket by sending an email to itsupport@psaa.com.sa which is connected to SA's account in Freshdesk platform, and the system will automatically open a ticket and reply to the requester by an email with his ticket number. IT specialist is responsible of opening tickets for support requests received verbally (calls) from running classrooms and labs, walk-in. IT specialist will also be responsible of opening tickets for any defects found during routine checks.

2.6. Training Management System (TMS)

TMS is a cloud-based software designed especially for SA to handle all training processes, including receiving training requests, enroll trainees, assigning instructors and facility, conducting the training and issue certificates and invoices.

IT department is responsible of providing technical support for all TMS users including trainees, training scheduling staff, Finance staff, Sales & Marketing staff, instructors and customer planners.

All detailed information and instruction needed for IT specialist to work on TMS is available on the below PDF file located in PSAA ShareFile/Information Technology folder:

[PSAA Share File - TMS - All Documents \(sharepoint.com\)](#)

2.7. EDRAK System

EDRAK system is a platform designed especially for SA to all CBT learning activities. The system is locally hosted in SA premises in (communication room in 1st floor, building 1).

IT department is responsible of providing technical support for all EDRAK users including trainees, instructors and training scheduling staff.

2.8. Business Continuity Plan

- In case facing a failure in any of the above-mentioned systems, please follow the below steps to ensure business continuity:
 - Troubleshoot the problem and apply needed fix as soon as possible (contact vendor if needed).
 - For EDRAK system, If the troubleshooting took more than one day, switch to EDRAK backup server immediately (return back to the main server once problem is fixed).

		IT Specialist	

Create New Path in TMS Process (Workflow Description):

1. IT specialist will receive tickets on Freshdesk system raised by Training Department.
2. IT specialist will check the provided "New Path Creation" form if completed?
If the provided form is not completed, IT specialist will advise the requester to complete the form and raise the request again and go to step 6.
If the provided form is completed, IT specialist will go to the next step.
3. IT specialist will build the new path in TMS.
4. IT specialist will review the newly created path and ensure no missing data (especially Department Name, Path Duration and Minimum & Maximum attendees.
5. IT specialist will send an email to Sales & Marketing department at psaasales@saudia.com informing them that a new path has been created in TMS providing path name and path code, copying the training department.
6. IT specialist will update & close the ticket.

★ Chapter 4 EDRAK System Routine Policy

- Daily routine checks on EDRAK system will be conducted by IT specialist.
- “EDRAK Routine Maintenance Card” form number “F02” is used to document daily routine activities.
- Soft copy of “EDRAK Routine Maintenance Card” is available on (PSAA Share File/Information Technology/Forms).
- IT specialist will print a copy of “EDRAK Routine Maintenance Card” at the beginning of each month. This form will be filled on daily bases following Daily routine check lists below.
- At the end of each month, “EDRAK Routine Maintenance Card” will be scanned to (PSAA Share File/Information Technology/EDRAK Maintenance Routine Card Records).
- Any issues found during daily routine check, IT specialist should open a ticket in Freshdesk system.
- **ONLY** SA IT personal should have access to Communication Room located in 1st floor.

4.1. Daily Routine Checks

EDRAK DAILY ROUTINE CHECK LIST		
#	Description	Loc.
